

As a concerned citizen, once again I am shocked and terrified to realize that the power in America is being slowly and deliberately given to the rich and powerful conglomerates of this country. As I understand it the FCC and it's chairman Mr. Powell intend to lax the rules thus allowing corporate America to all but take over the airways. With "plans to end the long-standing federal checks and balances on corporate media power". I don't feel that this is in the public interest. It seems to belie the very purpose of the FCC's commitment and that is to protect the public interests and to assure them fair, balanced and unbiased information. Let the laws stand that assures the citizens of this nation that the FCC (an agency of our government that was founded for the purpose of protecting us) is working in our behalf and not that of corporate America.
